AUGUSTIN CHEVALIER

Mechanical Engineering Student

augustin.chevalier.pro@gmail.com | +33 7 85 65 03 68 | Lyon, France

PROFESSIONAL SUMMARY

2nd-year mechanical engineering student in a work-study program at INSA Lyon (France), with over 2 years of design-office experience in CAD design and prototyping (SolidWorks). Experienced in standardizing components and in requirements-driven design of complex systems. Seeking a 9-week technical internship abroad in Summer 2027 to contribute to an innovative engineering team.

WORK EXPERIENCE

HAcare — Tours, France

Mechanical Design Engineer (Work-Study Apprentice) — September 2025 - Present

- Design and improve mechanical systems in SolidWorks (3D modeling, assemblies, technical drawings).
- Standardize the product range: harmonize CAD methods and mechanical components across projects.
- Build, assemble and test prototypes to validate design concepts; support cost and market studies.

HAcare — Tours, France

Mechanical Technician (Work-Study Apprentice) — September 2024 - August 2025

- Designed 2D/3D mechanical parts in SolidWorks and produced complete Bills of Materials (BOM).
- Improved product reliability by refining CAD models based on requirements analysis and feedback.
- Tracked project milestones and contributed to problem-solving in weekly engineering meetings.

AutoMachine — Tours, France

Mechanical Design Office Intern — March 2024 - June 2024

- Designed custom motorized systems, including structural sizing and mechanical calculations.
- Prototyped and tested new mechanical concepts to support continuous design improvement.
- Took components from initial concept through to physical realization.

EDUCATION

INSA Lyon (National Institute of Applied Sciences) — Lyon, France

Engineering Degree (Master's level) in Mechanical Engineering — 2025 - Present

- Work-study (apprenticeship) track: Mechanical Engineering, Design & Product Innovation

Université d'Angers — Angers, France

Bachelor of Technology (BUT) in Mechanical Engineering — 2022 - 2025

- Major in Mechanical and Manufacturing Engineering

SKILLS & INTERESTS

- CAD & Prototyping: SolidWorks (3D modeling, assemblies, drafting), 3D printing (FDM).
- Engineering: Component standardization, requirements analysis, mechanical problem-solving.
- Other tools: Fusion 360, 3DEXPERIENCE, MATLAB, RStudio, finite element method, Microsoft 365.
- Languages: French (native), English (B1).
- Interests: Formula 1, 3D printing, sport (bouldering and strength training), cinema.
